Our Voices

Project Manager

I've always had servant leadership at the forefront of my approach.

I believe in leading to the right solution by getting the right people in the room, getting the right questions asked, creating the environment for the group to land on best approach.

I learn about issues, see patterns in data, and ask questions, lets me anticipate how things will or might happen, so I can be proactive and strategic.

They needed a big thinker and small thinker, and I have both.

Our Voices

Hiring Manager

I want a BA who can connect the dots.

I need people who can deal with the dynamics, someone who will figure it out; get contextual understanding and is comfortable with chaos.

They must go get the knowledge AND they have to have a delivery mindset.

I don't want someone who only knows how to fill a template, or do one task and does not care what happens before and after.

Our Voices

Business Analyst

We must focus wide, almost an environmental consciousness, taking in everything: terrorism, cyber terrorism, infrastructure, health/wellness, millennials, many global perspectives.

We need to see the connections to a bigger picture.

We need a systemic perspective, that's key.

I hear this from every client I work with.
